

Boğaziçi Zirvesi 5

Bosphorus Summit

10-11-12 DECEMBER 2014
FOUR SEASONS HOTEL BOSPHORUS
ISTANBUL

The world is going through a new era which is reshaped by new dynamics of economy and developing markets. Along with these shifting balances, that especially sprung from the region that Turkey is situated in as well, comes the search for new alternative routes. In the process of globalization, political, economic, cultural and scientific cooperation can no longer be maintained only through the organic bonds formed between governments but can only keep on developing with the support of nongovernmental organizations as well, hence "Regional Cooperation" is one of the most pivotal and vital elements that will shape our future.

Emerging from the stated factors, International Cooperation Platform was founded in order to contribute to the cooperation procedure of economics, politics, culture and science in the region by bringing together politicians, prominent businessmen/ businesswomen and especially young leaders and offering a common platform for result oriented dialogues and collaboration.

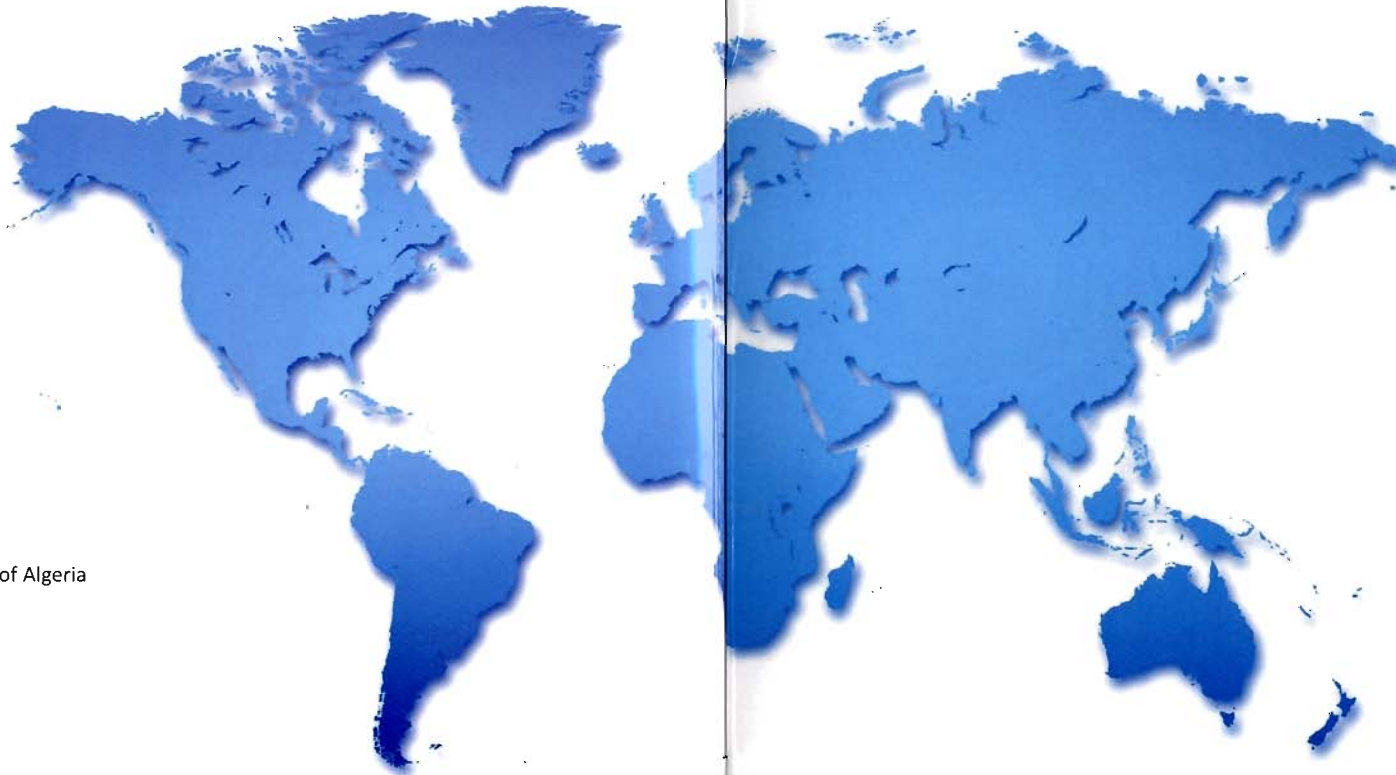

Giving voice to necessity of working and acting together in order to achieve long lasting economic development hence maintaining stable and sustainable growth is the main purpose of ICP as well as contributing to inter-global strategic cooperation process in order to benefit with a maximum efficiency from the opportunities provided by the global economy.

In the world of today, while international development is gaining a more multidimensional condition, we firmly believe that the added value generated under the roof of ICP will bring benefits on a global scale in terms of mutual ideals, national interests, economic, political and cultural cooperation.

International Cooperation Platform, towering upon the given basic truths and targets, gathers the principals that are suggested to maintain a healthy "sustainable development" between the countries of the region, under eight main titles.
