First Coordination Meeting for the Pharmaceutical Industry

in the GCC & Yemen

Doha: 11 April 2011

Background

The pharmaceutical market in GCC countries & Yemen exceeds 6 billion USD. This market is growing rapidly and is expected to reach around 10 billion USD by 2020. Despite the growth of this market, local manufacturing is not able to meet the growing demand, and GCC countries continue to import most of their needs in medicines from abroad. Therefore, significant opportunities exist for growth and expansion of this sector in GCC. Expanding growth in this industry would also help to achieve the strategic objectives of the region in terms of industrial diversification into knowledge based industries.

As a part of its mandate to promote technical and policy coordination, GOIC has been organizing specialized coordination meetings for concerned bodies in the member states on regular basis. The proposed coordination meeting is the first of its kind in the sector and it could serve as a catalyst to promote further coordination at the horizontal and vertical levels.

Objectives

- 1. Create a forum for the exchange of ideas and dialogue among pharmaceutical companies in GCC & Yemen.
- 2. Propose a multi-client study that will address the needs of the pharmaceutical industry in the region.
- Identify the need for establishing a pharmaceutical trade association for GCC producers.

Activities

The meeting will include the following presentations and working papers:

- "The current and future trends of the pharmaceutical industry in the GCC," by GOIC.
- 2. "The pharmaceutical industry in global perspective," IMS Health.
- 3. "International expansion plans and potential opportunities in GCC States and Yemen," by a multinational pharmaceutical company.
- 4. "Challenges for regional and global expansion," by a GCC pharmaceutical company.
- 5. "A concept note for a multi-client study on the pharmaceutical Industry in GCC," the study will be conducted jointly with UNIDO.
- "Proposal to create a trade association to represent the pharmaceutical industry in the gulf," by GOIC.

Date and Venue

One day, Monday 11th April 2011 Doha Sheraton Hotel (Al-Maha Hall), Qatar
